

In the past the NYSRRC reserved numbers system has not been maintained. Once you reserved a number it was your's for life. This has resulted in people having numbers reserved for them after they have changed classes or stopped racing.

So, to alleviate the problems we are going to institute a process for updating the reserved number information yearly. You will have from the last NYSRRC race in the fall until the first of March to resubmit your information to the NYSRRC administrator. After March 1, all numbers that have not been renewed will be deleted and they can be reserved on a first come first served basis by any driver.

If there are no changes to your information, please e-mail Marsha Toombs at metoombs@netacc.net stating that. If you want to keep your Number and are staying in the same class but there are changes to the Make, Model or Year of your race car, please also e-mail Marsha with the changes.

As stated above if you have not notified Marsha of your intention to keep your reserved number by March 1st, all your information will be deleted.
